

Embroidery Placement Guide for Infants, Toddlers, & Children

After presenting our Embroidery Placement Guide, we received many requests for a guide geared specifically toward placing designs on children's clothing. We are pleased to present our placement guide for infant, toddler, and children's clothing! Deciding placement for children's clothing can be somewhat difficult considering that there are many different sizes and styles. Below you will find guidelines for placing designs on everything from bibs to polo shirts, onesies to jacket backs.

Correct design placement depends largely on individual taste. Therefore, when you are placing a design make sure that it looks good to you.

We suggest that you print a paper template of the design at full size (using embroidery software) to use for design placement. All measurements have been taken from the edge of the garment to the center of the design, unless otherwise noted.
